

SAFETY DATA SHEET

1. Identification

Product identifier Bismuth Alloys

Other means of identification

SDS number 111

Product code C89320, C89325, C89510, C89360, C89510, C89520, C89530, C89831, C89833, C89835,

C89837

Recommended use Manufacturing **Recommended restrictions** Not assigned.

Manufacturer / Importer / Supplier / Distributor information

Company name Advance Bronze, Inc.

Address 139 Ohio St. - PO Box 280, Lodi, OH 44254

330-948-1231 **Telephone** John Wenneman **Contact person**

johnw@advancebronze.com E-mail

1-800-424-9300 **Emergency phone number**

Chemtrec (24-hrs)

2. Hazard(s) identification

Not classified. Physical hazards

Health hazards Sensitization, skin Category 1

Carcinogenicity Category 2

Specific target organ toxicity, repeated

exposure

Category 2 (Lung)

Not classified.

OSHA hazard(s) Label elements

Hazard symbol

Signal word Warning

Hazard statement May cause an allergic skin reaction. Suspected of causing cancer. May cause damage to organs

(Lung) through prolonged or repeated exposure by inhalation.

Precautionary statement

Prevention Obtain special instructions before use. Do not handle until all safety precautions have been read

> and understood. Use personal protective equipment as required. Contaminated work clothing should not be allowed out of the workplace. Wear protective gloves/protective clothing. Do not

breathe fumes and dusts.

Response If on skin: Wash with plenty of soap and water. If skin irritation or rash occurs: Get medical

> advice/attention. Specific treatment (see this label). Wash contaminated clothing before reuse. If exposed or concerned: Get medical advice/attention. Get medical advice/attention if you feel

unwell.

Storage Store locked up.

Disposal Dispose of contents/container to a facility that has permission of disposing the industrial waste.

Hazard(s) not otherwise

classified (HNOC)

Not classified.

3. Composition/information on ingredients

Mixture

Hazardous components

Chemical name	Common name and synonyms	CAS number	%
Copper		7440-50-8	85-91
Tin		7440-31-5	4-7.5

Bismuth Alloys SDS ENG #110 Version: 1.0 1/7

Hazardous components Chemical name	Common name and synonyms	CAS number	%
Bismuth		7440-69-9	0.5-6
Selenium		7782-49-2	0-1.1
Nickel		7440-02-0	0-1

Composition comments

All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume. The alloy contains additional alloying elements at concentrations below disclosure requirements. At temperatures above the melting point the alloys may liberate fumes containing oxides of alloying elements.

4. First-aid measures

Inhalation In case of exposure to fumes or particulates: Move to fresh air. Get medical attention if discomfort

persists.

Skin contact Contact with dust: Wash skin with soap and water. In case of allergic reaction or other skin

disorders: Seek medical attention and bring along these instructions. In case of contact with hot or molten product, cool rapidly with water and seek immediate medical attention. Do not attempt to remove molten product from skin because skin will tear easily. Cuts or abrasions should be

treated promptly with thorough cleansing of the affected area.

Eye contact Do not rub eyes. Remove any contact lenses. Flush eyes thoroughly with water, taking care to

rinse under eyelids. If irritation persists, continue flushing for 15 minutes, rinsing from time to time

May cause skin and eye irritation. May cause irritation to mucous membranes. Cough. Shortness

under eyelids. If discomfort continues, consult a physician.

Ingestion Rinse mouth thoroughly if dust is ingested. Only induce vomiting at the instruction of medical

personnel. Get medical attention if any discomfort continues.

Most important symptoms/effects, acute and

delayed

Indication of immediate medical attention and special Treat symptomatically. Symptoms may be delayed.

of breath. Wheezing. Sensitization.

treatment needed

General information

Get medical attention if any discomfort develops. Seek medical attention for all burns, regardless how minor they may seem. Show this safety data sheet to the doctor in attendance.

5. Fire-fighting measures

Suitable extinguishing media

Unsuitable extinguishing media

Specific hazards arising from

the chemical

Special protective equipment and precautions for firefighters

Fire-fighting equipment/instructions Special powder against metal fires. Dry sand.

Do not use water or halogenated extinguishing media. Do not use water on molten metal:

Explosion hazard could result.

During fire, gases hazardous to health may be formed. Solid metal is not flammable; however, finely divided metallic dust or powder may form an explosive mixture with air. In a fire, nickel may

form nickel carbonyl, a highly toxic substance and known carcinogen.

Self-contained breathing apparatus and full protective clothing must be worn in case of fire. Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace.

Move containers from fire area if you can do it without risk.

6. Accidental release measures

Personal precautions. protective equipment and emergency procedures

Ensure adequate ventilation. Avoid inhalation of dust and contact with skin and eyes. Wear protective clothing as described in Section 8 of this safety data sheet.

Methods and materials for containment and cleaning up

Avoid dust formation. Allow spilled material to solidify and scrape up with shovels into a suitable container for recycle or disposal. Collect dust using a vacuum cleaner equipped with HEPA filter. The vacuum cleaner should be explosion-proofed. If not possible, gently moisten dust before it is collected with shovel, broom or the like. This material and its container must be disposed of as hazardous waste.

Environmental precautions

Avoid release to the environment. Do not contaminate water.

ENG Bismuth Alloys SDS 2/7

#110 Version: 1.0 Issue date: June 01, 2015

7. Handling and storage

Precautions for safe handling

Welding, burning, sawing, brazing, grinding or machining operations may generate fumes and dusts of metal oxides. Provide adequate ventilation. Avoid contact with sharp edges and hot surfaces. Avoid inhalation of dust and contact with skin and eyes. Avoid generation and spreading of dust and fumes. Avoid contact with hot or molten material. Dust clouds may be explosive under certain conditions. Take precautionary measures against static discharges when there is a risk of dust explosion. Use explosion-proof electrical equipment if airborne dust levels are high. To prevent and minimize fire or explosion risk from static accumulation and discharge, effectively bond and/or ground product transfer system. Wear appropriate personal protective equipment. Do not use water on molten metal. Do not eat, drink or smoke when using the product. Keep the workplace clean. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities Keep dry. Store away from incompatible materials.

8. Exposure controls/personal protection

Occupational exposure limits

US. OSHA Table 7-1 Limits for Air Contaminants (29 CFR 1910.1000)

ENG Bismuth Alloys SDS 3/7 #110 Version: 1.0

General hygiene considerations

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated uniforms should be laundered separately from other clothing to prevent potential cross-contamination. If possible, an industrial laundry service should be used to eliminate the possibility of contaminating the home environment. Handle in accordance with good industrial hygiene and safety practices. Observe any medical surveillance requirements.

9. Physical and chemical properties

Appearance Shapes, Solids, Tubes & Turnings.

Physical state Solid.

Form Shapes, Solids, Tubes & Turnings.

Color Yellow to red.

Odor None.

Odor threshold Not available. pH Unknown.

Melting point/freezing point 1725.8 °F (941 °C)

Initial boiling point and boiling

range

Not available.

Flash point Not available.

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower

Not available.

(%)

Flammability limit - upper

Not available.

(%)

Explosive limit - lower (%) Not available.

Explosive limit - upper (%) Not available.

Vapor pressure Not available.

Vapor density Not available.

Relative density Not available.

Solubility(ies) Insoluble in water.

Partition coefficient

Not available.

(n-octanol/water)

Auto-ignition temperatureNot available.Decomposition temperatureNot available.ViscosityNot available.

Other information

Bulk density 0.313 - 0.323 lb/in³

10. Stability and reactivity

Reactivity Not available.

Chemical stability Stable at normal conditions. Massive metal is stable and non reactive under normal conditions of

use, storage and transport.

Possibility of hazardous

reactions

Hazardous polymerization does not occur. Hot molten material will react violently with water

resulting in spattering and fuming.

Conditions to avoidContact with incompatible materials. Contact with acids will release flammable hydrogen gas.

Avoid dust formation. Dust clouds may be explosive under certain conditions.

Incompatible materials Acids. Ammonium nitrate. Fluoride. Halogens. Nitrates. Phosphorus. Strong oxidizing agents.

Sulfur.

Hazardous decomposition

products

Welding, burning, sawing, brazing, grinding or machining operations may generate dusts and

fumes of metal oxides. Phosphorus oxides. Selenium/selenium oxides.

11. Toxicological information

Information on likely routes of exposure

Ingestion Not relevant, due to the form of the product. However, ingestion of dusts generated during

working operations may cause nausea and vomiting.

Bismuth Alloys SDS ENG #110 Version: 1.0 4 / 7

Inhalation Elevated temperatures or mechanical action may form dust and fumes which may be irritating to

the mucous membranes and respiratory tract. In sensitized individuals, exposure causes an

asthma-like attack, with wheezing, bronchospasm, and dyspnea.

Skin contact May cause an allergic skin reaction. Hot or molten material may produce thermal burns. Workers

allergic to nickel may develop eczema or rashes. Acute exposure to cobalt metal, dust, and fume may cause irritation of skin and eyes. In sensitized individuals, exposure causes an asthma-like

attack, with wheezing, bronchospasm, and dyspnea.

Eye contact Molten material will produce thermal burns. Elevated temperatures or mechanical action may form

dust and fumes which may be irritating to the eye.

Symptoms related to the physical, chemical and toxicological characteristics

May cause irritation to mucous membranes. May cause skin and eye irritation. Coughing.

Wheezing. Shortness of breath. Sensitization.

Information on toxicological effects

Acute toxicity High concentrations of freshly formed fumes/dusts of metal oxides can produce symptoms of

metal fume fever. Acute exposure to dust, and fume may cause irritation of skin and eyes. In sensitized individuals, exposure causes an asthma-like attack, with wheezing, bronchospasm,

and dyspnea.

Skin corrosion/irritation Elevated temperatures or mechanical action may form dust and fumes which may be irritating to

the eye, mucous membranes and respiratory tract. Hot or molten material may produce thermal

burns.

Serious eye damage/eye

irritation

Dust from machining operation in the eyes may cause irritation.

Respiratory sensitization Not classified.

Skin sensitization Frequent or prolonged contact may defat and dry the skin, leading to discomfort and dermatitis.

May cause sensitization by skin contact. Pre-existing skin conditions including dermatitis might be

aggravated by exposure to this product.

Germ cell mutagenicity No data available.

Carcinogenicity Suspected of causing cancer.

IARC Monographs. Overall Evaluation of Carcinogenicity

Nickel (CAS 7440-02-0) 1 Carcinogenic to humans.

Selenium (CAS 7782-49-2) 3 Not classifiable as to carcinogenicity to humans.

NTP Report on Carcinogens

Nickel (CAS 7440-02-0) Known To Be Human Carcinogen.

Reasonably Anticipated to be a Human Carcinogen.

Reproductive toxicity Nickel: Has shown teratogenic effects in laboratory animals.

Specific target organ toxicity -

single exposure

May cause respiratory irritation.

Specific target organ toxicity -

repeated exposure

Causes damage to the following organs through prolonged or repeated exposure: Lung.

Aspiration hazard Not available.

Chronic effects Harmful: danger of serious damage to health by prolonged exposure through inhalation. Chronic

inhalation of high concentrations of iron oxide fumes or dust may lead to benign pneumoconiosis (siderosis). Prolonged and repeated overexposure to dust and fumes can lead to benign pneumoconiosis (stannosis). Chronic inhalation of metallic oxide dust/fume may cause metal

fume fever.

Further information Welding or plasma arc cutting of metal and alloys can generate ozone, nitric oxides and ultraviolet

radiation. Ozone overexposure may result in mucous membrane irritation or pulmonary

discomfort. UV radiation can cause skin erythema and welders flash.

12. Ecological information

Ecotoxicity Alloys in massive forms present a limited hazard for the environment. The product contains a

substance which may cause long-term adverse effects in the environment.

Components Species Test Results

Selenium (CAS 7782-49-2)

Aquatic

Fish LC50 Fathead minnow (Pimephales promelas) 0.94 - 1.2 mg/l, 96 hours

Persistence and degradability The product is not biodegradable.

Bioaccumulative potentialThe product contains potentially bioaccumulating substances.Mobility in soilAlloys in massive forms are not mobile in the environment.Mobility in generalAlloys in massive forms are not mobile in the environment.

Other adverse effects

An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

Bismuth Alloys SDS ENG #110 Version: 1.0 5 / 7

13. Disposal considerations

Disposal instructionsThis material and its container must be disposed of as hazardous waste. Dispose in accordance

with all applicable regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Hazardous waste code Z110: Inorganic compounds n.o.s.

Waste from residues / unused

products

Recover and recycle, if practical. Solid metal and alloys in the form of particles may be reactive. Its hazardous characteristics, including fire and explosion, should be determined prior to disposal.

Contaminated packaging Not applicable.

14. Transport information

DOT
